

## Anthem Shared Funding - an attractive option for groups with 25-99 employees

January 24, 2014

With Anthem Shared Funding, your clients in the 25-99 market can benefit from the advantages of both a fully insured plan and a self-funded plan along with integrated stop loss. Like a fully insured plan, groups with an Anthem Shared Funding arrangement can count on predictable fixed monthly payments, coverage for claims run out (also known as terminal liability), with a cap on financial responsibility.

But, like an ASO plan, groups in Anthem Shared Funding can experience money-back savings potential when claims experience is better than anticipated; standardized reports that can help groups understand plan costs; savings on premium tax and health care reform taxes, and greater plan design options.

Here is an [overview flier](#) as well as a [flier](#) that details the specific products that can be offered under the Anthem Shared Funding arrangement. We encourage you to give this information to your clients who may be interested in learning more about Anthem Shared Funding. As always, if you have any questions, please reach out to your Anthem Sales representative.
